

Cybersecurity Incident Disrupting Bankruptcy Court Operations

Published on October 15, 2026

BAE Systems IT and websites that support the operations of the Bankruptcy Noticing Center (BNC) have been impacted by a cybersecurity incident. The BNC produces and transmits bankruptcy notices for all federal bankruptcy courts around the country, and BAE Systems operates BNC systems and websites on behalf of the Federal Judiciary.

The Administrative Office of the U.S. Courts has been in communication with the impacted courts and is also coordinating with BAE Systems. BAE is actively investigating this incident and working to restore operations.

As a result of the incident, all access to the BNC systems and websites that BAE operates on behalf of the judiciary and the related bankruptcy noticing process are unavailable at this time, including bnc.uscourts.gov, bankruptcynotices.uscourts.gov, notices.uscourts.gov, and the National Creditor Registration Service. The incident has also halted the BNC's production and distribution of bankruptcy notices for bankruptcy courts.
