

[ONGOING] PHP SECURITY VULNERABILITY AFFECTING HOSTING SERVICES | OCTOBER 21, 2026

DEDICATED SERVERS, HOSTING, RESELLER SERVERS, SHARED SERVERS, VPS

🕒 OCT 21 2026 09:31:AM AMERICA/NEW_YORK 👤 LOSHINI V

Dear customers,

Please note that two PHP security vulnerabilities, known as **PHP2Shell (CVE-2026-109618 and CVE-2026-109619)**, have recently been disclosed. You may find more information about the vulnerability at <https://www.php.net/archive/2026.php#2026-10-20-1>

Affected Services: Websites and applications running PHP (all versions) on all platforms.

Current Status:

- * Mitigation measures have been put in place across all our platforms to reduce the risk of exploitation.
- * An official fix from the PHP project has not yet been released.
- * Once the official fix becomes available, we will apply it across our platform.

In the meantime, customers are advised to keep their CMS, themes, plugins, and other applications up to date and regularly monitor their websites for any unusual activity.

Thank you for your patience and understanding. We will update this status post as soon as more information becomes available.

Update @ Oct 21, 09:40 AM EDT | 01:40 UTC

The **php.net** team has released the updated versions. Our

please update PHP now to the fixed version.

Update @ Oct 21, 12:50 PM EDT | 4:50 UTC

All public services affected by those vulnerabilities are mitigated; final patches are in progress. We appreciate your patience!

Update @ Oct 21, 4:40 PM EDT | 8:40 UTC

We are glad to let you know that the newly patched versions are now available in the CloudLinux staging repositories; we are deploying them to a focus group of servers. Your patience would be highly appreciated!

Update @ Oct 21, 11:10 PM EDT | October 22 3:10 UTC

We apologize for the delay in the resolution, our team is still working on deploying the latest versions to the servers. Please stay tuned and thank you for your patience.

Update @ Oct 22, 01:18 AM EDT | 5:18 UTC

We are happy to let you know that the deployment of the latest versions to the servers is almost over, our team is working as hard as possible to finalize the fix of the issue in the shortest terms. We will update you once it is over. Thank you for your patience!

Update @ Oct 22, 02:41 AM EDT | 6:41 UTC

While our team is proactively working on the fix deployment, we wanted to update you with the list of the servers that are still in progress:

Reseller: 11, 14, 38, 40, 48-49, 52, 55, 62, 71, 74

Regular: 39, 64, 71-72, 86, 105, 125, 144, 146, 165, 188, 197, 230, 232, 239, 251, 254, 258-259, 261, 263-264, 305-306, 310, 312-313, 315, 319-321, 325-327.

All other servers are already processed. We will update you once the servers mentioned above are processed as well.

Thank you for your understanding!
