Amadeus Statement

October 2026

Amadeus became aware of a vulnerability affecting a travel booking display environment.

Certain booking-display data was accessible through the vulnerability.

Although our investigations continue, we can confirm that there is no evidence that payment or financial data was accessed.

There are no indications that this vulnerability has been exploited for ransomware purposes.

Amadeus implemented measures to fix the vulnerability as well as enhanced monitoring and detection capabilities.

We are in direct dialogue with our customers and authorities.
